Subject: Effort of Eliminate Labeling of Irradiated Foods

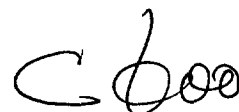

Defiantly labeling is needed, prominently displayed including the logo for irradiation. We need to be well informed what is done to the food we eat to make it 'SAFE' for human consumption. Of course this is all backwards. The safety standards should start at the other end. How the food we eat is grown, raised, fed, marketed, slaughtered, additives to feed, sanitation, and the whole production process are where changes should be made.

Sincerely,

A handwritten signature in cursive script that reads "Virginia Hamill". The signature is written in dark ink and is positioned above the printed name.

Virginia Hamill

98N-1038

Handwritten initials or a signature, possibly "C. Doe", written in a cursive style.
